Department of Biomedical Engineering
1st Year

Papered By:
Dr. Taqwa Oday

Introduction

- Microsoft PowerPoint is one of the most popular presentation programs that can be used to create interactive presentations for classroom, business, or personal use

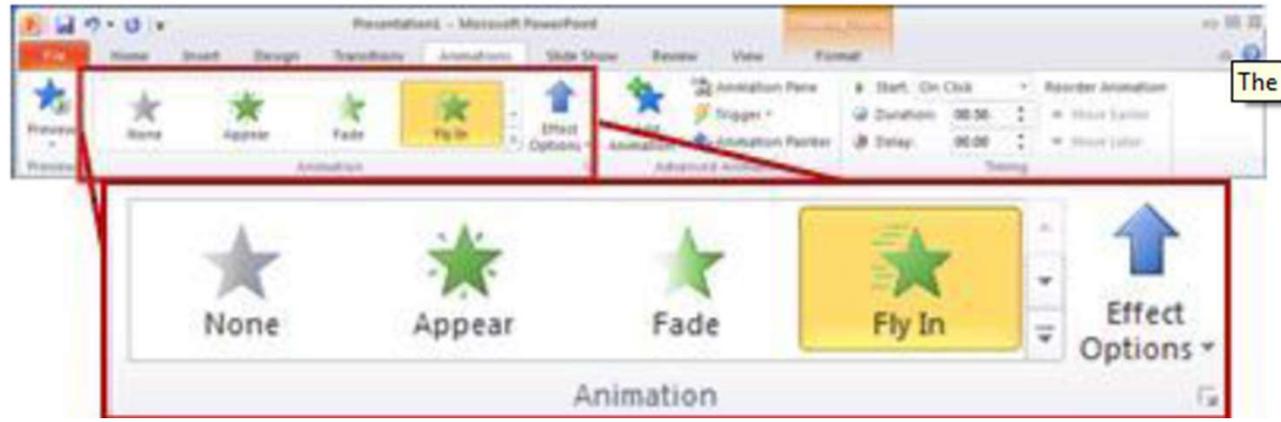

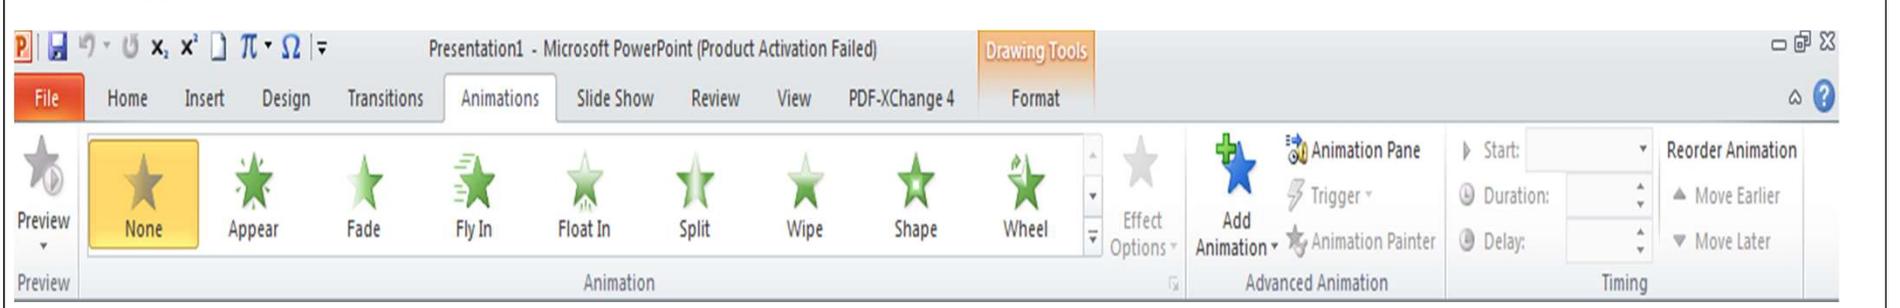

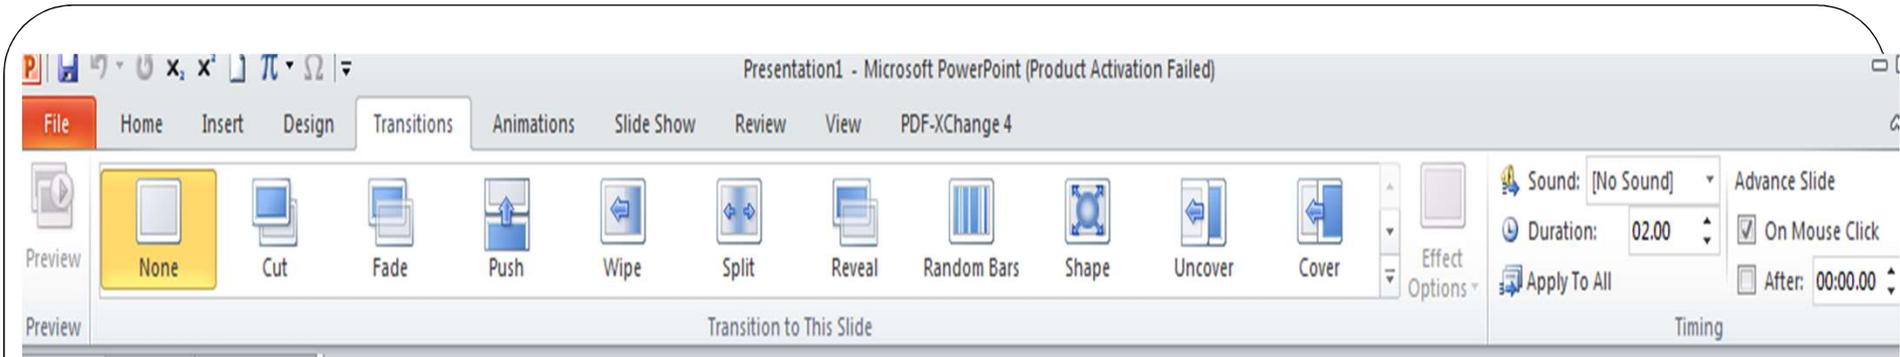

- The Design Ribbon toolbar contains several categories for formatting the design and elements of your presentation. These include:
 - Home,
 - Insert,
 - Design,
 - Transitions,
 - Animations,
 - Slide Show,
 - Review and
 - View.
- These icons are convenient but will not bring up dialogue boxes that allow you to change the settings of these
- actions. You should use whichever method works the best for you.

FORMATTING

- The default slide design for Microsoft PowerPoint documents is a blank slide.
- Therefore, if you want your slides to have a specific design, you must add one. To do this on a PC, go to the Design Ribbon > Themes .
- To change the theme of your presentation, click on the theme that you like and it will automatically apply to your slide.

Item is selected, which brings up formatting options displayed above.

Animate the Bulleted List

- Click on the **Animations** tab.
- Choose **Custom Animation** from the **Animations** group.
- The **Custom Animation** window appears to the right of your slide.
- Click on the **Add Effects** tab.
- Select **Entrance**.
- Choose **More Effects...** to see a complete list of effects.
- By default, your slide should run a preview the chosen animation
- as
- you click on it once.
- Click OK.

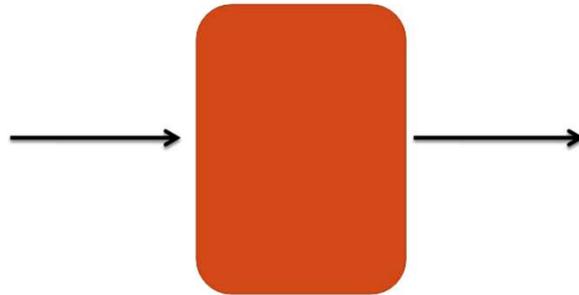

Assignment 1

- Create a presentation of 3 slides with an appropriate slide theme.
- Utilize WordArt on your title slide in the first slide to write lab name.
- Insert clip art or picture in the second slide.
- Add a Table with two columns and three rows to the third slide.
- Select a transition and apply it to all slides.
- Insert a footer on slides with a date/time that updates automatically. and slide numbers.
- Apply appropriate animation to at least one slide.

Assignment 2:

- Create the following figure:

- For each object (shape) in the above figure, apply different entrance effect, and the entered arrow starts on click, while the other objects start each after previous.
